

### The Neways Philosophy

To provide a premier service through commitment to our client's requirements for a prompt, efficient and reliable service throughout each project. Supported by our continued investment and the recruitment of only the highest qualified trades personnel in order to maintain our reputation.

# domestic & commercial property care . . .

# for your future peace of mind

### A Greener Neways

Neways are committed to reducing our carbon footprint in all construction and maintenance work carried out. Neways have embraced an active approach to waste management, by recycling rather than land filling our waste materials. ### NEWAYS are a regional maintenance provider

With capability to offer close attention to small works, yet comfortably handle the largest projects.

Established in 1971 to service both domestic and commercial sectors, NEWAYS employ a highly skilled continually trained workforce and, through paying great attention to detail, have acquired an enviable reputation for reliably completing projects on time and within budget, with the minimum of disruption - leaving each site clean, tidy and ready for occupation.

### Planned Maintenance Contracts / Response Maintenance

For Building Owners, Managing Agents & Facilities Managers Neways provide a planned preventative maintenance service, for both long & short term contracts . . . for your future peace of mind.

### Insurance Repairs

Neways partner with numerous insurance companies and loss adjusters to provide solutions for fire and flood damage, underpinning, vandalism, water and storm damage.

- Insurance Approved Restoration Contractors for property service companies and proactive loss adjusters.
- All projects managed by qualified surveyors supported by a dedicated technical and administrative team.

### Specialists in Flood & Construction Drying

Neways understand the importance of a fast response following fire, flood and water escapement damage, and offer a complete service from stripping out to drying, sanitising and restoration. Our experience in this field and knowledge of pre-loss mitigation can help to reduce the cycle time of each project.
